Abstract (en)

[origin: EP1675226A2] The brush baseplate has a radial guidance for carbon brush conductors (3) and U-shaped brush guidance sheet metals (4) provided by radially shifted sheet metal feet (5), whose topology to each other is rotationally symmetric and placed through suitably assigned assembly holes (6). Two sheet metal feet (5) are separated from their assigned next guidance final side of the brush guidance sheet metal (4). Between base plate and the brush guidance sheet metals (4), a floor plate is arranged with the sheet metal feet (5) and has holes (8), through which the sheet metal feet (5) can be inserted.
