Abstract (en)
[origin: WO2005037051A1] The aim of the invention is to create a dishwasher comprising a device for placing pieces of silverware, which makes it possible to dispose the pieces of silverware in an easily accessible, compact, and careful manner in the washing compartment while keeping production costs low. Said aim is achieved by arranging the device (3, 4, 5) for placing pieces of silverware (7) on an exterior side of a dish basket (1). The inventive dishwasher also has the advantage of requiring no additional tray for placing the pieces of silverware (7), thus reducing production costs. The inventive device for placing pieces of silverware is particularly suitable for use in a built-in dishwasher.
