Abstract (en)
[origin: WO2005037707A1] The invention relates to a riding/driving halter comprising a throat latch (11) and cheek pieces (7) for fastening the at least one throat latch (11) and a bit on the horse's head. In order to reduce disturbing effects on the horse's crest, the cheek pieces (7) extend at an angle through a buckle so that a tensile force in the cheek pieces (7) is directed towards the horse's neck.
