Abstract (en)

[origin: WO2005040987A2] Methods and systems in which Personal Video Recorders, Video On-Demand systems, Internet media visual data providers are employed to deliver visual content to gain specialized programming slots are described. Exemplary embodiments of the present invention provide ways to use these visual content suppliers to produce screen space that can be used for advertisement, still pictures, interactive games, slide shows, telephony functions or other images while the Personal Video Recorder (or like device) is in a state other than "play." The present invention may be used in conjunction with, for example, televisions, computers, cellular phones and other visual media systems.
