Abstract (en)

[origin: EP1677318A2] The device has a table, and a connector support tool (100) fitted with two jaws (101, 102) and deformable pads (109) for fastening a connector to the support tool. The table is extended along a longitudinal axis and includes a set of longitudinal grooves. A graduated rule is secured to the table and extends parallel to the longitudinal axis. An abutment serves as reference for measuring length of branches of a harness. An independent claim is also included for a method for manufacturing an electrical harness.
