Abstract (en)  
[origin: WO2005044485A2] The invention relates to a method for casting moulded parts, said method comprising the following steps: the mould is prepared by forming a core packet from the cores which are made of moulding sand; the metal melt is cast into the mould; the mould is subjected to thermal insulation prior to and/or after casting and the thermal process is used in a known manner inside the mould and/or insulation for controlled treatment of the casted moulded part and/or the moulded material forming the core packet.
