Abstract (en)
[origin: EP1524072A1] The machine has a metrology equipment (42) measuring a trimming cutter. The cutter to be cut and shaped is engaged in a tightening unit. A cleaning device (40) engages the cutter, which is held by a support, in a chamber. A guide unit cooperates with a control device for ensuring a relative displacement of the support with reference to a grinding wheel, the equipment and the device (40).
