Abstract (en)

[origin: WO2005028167A1] The invention relates to a supporting body (2) for the scaffold poles (3) of a position scaffolding (1) for positioning one or several tension jacks (29) or other functional elements. The inventive supporting body (2) comprises a joint (19) for connecting to a manipulator (30) and several double clamp devices (32) provided with paired clamping elements (4) for the cantilever fixation of the scaffold pole (3). Said double clamp devices (32) comprise parallel adjacent bars (5, 14, 16, 17) which are jointed to the supporting body (2) and form at least one pole reception area (8) whose cross section is adapted to the scaffold pole.
