Abstract (en)

[origin: FR2861356A1] The arrangement has an intermediate base (22) connected to a reservoir (12) by a venturi tube that comprises a supply pipe (16). A vertical detention unit (20) is interposed between the supply pipe and a master-cylinder (14). The pipe descends vertically on the master-cylinder and is immobilized on the master-cylinder by the unit (20) cooperating by direct detent with the master-cylinder. An independent claim is also included for a method of assembling a base of a reservoir on a master-cylinder.
