Abstract (en)  
[origin: FR2861058A1] The distributor has visible external surfaces (112, 142) partially covered with a substrate (2). A front side of the substrate is provided with visual information (24) e.g. logo, that is applied by an affixing technique. The substrate is transparent to make the external surfaces to be visible through the substrate except at level of the visual information that partially masks the external surfaces.
