Abstract (en)
[origin: WO2005040411A1] Diagnostics and Therapeutics for Diseases Associated with N-Acetylated Alpha-Linked Acidic Dipeptidase-Like 1 (NAALADASE-like1) Abstract of Disclosure The invention provides a human NAALADASE-like1 which is associated with the cardiovascular diseases, cancer, gastroenterological diseases, inflammation, hematological diseases, neurological diseases, reproduction disorders and urological diseases. The invention also provides assays for the identification of compounds useful in the treatment or prevention of cardiovascular diseases, cancer, gastroenterological diseases, inflammation, hematological diseases, neurological diseases, reproduction disorders and urological diseases. The invention also features compounds which bind to and/or activate or inhibit the activity of NAALADASE-like1 as well as pharmaceutical compositions comprising such compounds.
