Abstract (en)
[origin: WO2005036046A1] The invention relates to a grease handling system for grease dosing devices (10) comprising a plurality of portable grease storage tanks (12), a container pump (14), a plurality of filling-extracting stations (16) connectable to the container pump (14) and to the grease dosing devices (10), each of them being provided with a grease coupling cap (18) and a compressed air coupling cup (20), respectively. The plurality of portable grease storage tanks (12) is provided with a closing nipple (24) interacting with the grease coupling cap (18) leading to a grease chamber (22) and with a closing nipple (28) interacting with the compressed air coupling cup (20) leading to a compressed air chamber (26) which is divided with the grease chamber (22) by a movable wall (30).
