Abstract (en)
[origin: WO2005041385A2] The invention relates to a device for triggering an actuator (3). Said device comprises an energy store (7) for feeding the actuator (3), a receiver unit (2) for the contactless reception of a control signal, and a control unit (8) for controlling the energy supply to the actuator (3) according to the control signal. The inventive device is characterized in that energy for charging the energy store (7) can be supplied via the receiver unit (2).
