Abstract (en)
The method involves removing filter rods from a magazine, and selectively cutting the rods into filter plugs (111-113). The filter plugs of a respective cut filter rod are coaxially aligned to one another. The filter plugs are staggered in a displaced manner and displaced in a longitudinally axial manner to form a row of filter plugs conveyed one behind the other in a transverse-axial manner. An independent claim is also included for a method for producing filter cigarettes.
