Abstract (en)

[origin: EP1679026A2] An apparatus for collecting dust and vacuum cleaner having the same are disclosed, by which dust collecting performance is enhanced. The present invention a cyclone chamber (214) having a substantially cylindrical shape to separate particles from an introduced air and a dust chamber (212) provided under the cyclone chamber to store the dust separated by the cyclone chamber, the dust chamber having an inner circumference indented along a circumferential direction.
