Abstract (en)
[origin: EP1679099A1] The binding has a ski boot carrier (2) at which front sole and heel holders are arranged. The carrier is tiltable between an original position, in which the heel holder is lowered close to a ski upper side, and pivoted positions, in which the heel holder is away from the upper side. A movable guided track ensures that the sole holder is movable with respect to rotation axis parallel to a ski boot carrier longitudinal direction.
