Abstract (en)  
A refuse collection system comprises a chamber (1) permanently located below ground (2) which opens at ground level at the top, a cover (3) for opening and closing off the chamber (1), a container (14), open at the top, that can be accommodated in the chamber for collecting refuse via a deposit opening (5) in the cover (3), as well as a vehicle (18) that is provided with lifting gear (20) for lifting said container (14) out of the chamber, which container and lifting gear (20) are provided with coupling means (17,23) for coupling the lifting gear to the container when the cover is open. The coupling means (17,23) comprise at least one bayonet coupling (17,26).
