Abstract (en)

The device for the opening and/or closing of a door has an indicating device (6) which has at least two visual modules which are installed next to one another or above one another in a housing in the device. The visual modules can show fixed, alternating, or moving text, numbers, or graphic symbols. The visual modules can be interconnected in a circuit, and are covered by a front glass. A visual module comprises visual indicating elements and electric control and connecting elements. An independent claim is included for a use for a device which is on a revolving folding door, a folding leaf door, a sliding-swinging door, a room divider or a carousel door.
