Abstract (en)

[origin: WO2005044455A1] The invention relates to a cutting tool for a comminuting device or comminuting installation, particularly for fast operating devices or installations, comprising at least one rotor or one drum or the like and at least one counter tool, such as a shredder or the like. The inventive cutting tool is comprised of a cutting tooth (1), which can be placed onto the rotor or the drum of a comminuting device and which, on its side oriented in cutting direction (A), is provided in the form of a cutting body (2/1) with a number of cutting edges (2). The invention is characterized in that the cutting body (2/1) is provided with V-shaped milled out sections, whereby these milled out sections form the cutting edges (2).
