Abstract (en)

[origin: WO2005051562A1] The invention relates to a method for the production of a hollow profile, which comprises at least one flange (6; 8; 10; 11), by means of internal high pressure shaping. The measurements and the position of the flange (6, 8, 10, 11) are not altered, in relation to the embodied end hollow profile, during internal high pressure shaping.
