Abstract (en)

[origin: WO2005047356A1] The invention relates to aminomethyl functional alkoxyasilanes (A1) of general formula [1], wherein R<1> represents a hydrocarbon radical which is optionally substituted by halogen, R<2> represents an alkyl radical having 1-6 carbon atoms or an O-oxaalkyl-alkyl radical having a total of between 2-10 carbon atoms, R<3> represents an optionally substituted hydrocarbon radical, R<4> represents an optionally substituted hydrocarbon radical and a has a value of either 0, 1 or 2. The invention also relates to prepolymers produced from said silanes and to materials containing said prepolymers.
