Abstract (en)  
Device comprises an insert or adapter (1) in the form of a short profile section which is connected to one end of a profile rail (12) at the same height as the profile rail. Sliding elements (21) are introduced and latched in the grooves of the profile rail. Preferred Features: The inert or adapter has recesses (7, 8, 9) corresponding the cross-sectional shape of the sliding elements on the base side of the profile rail on the limits of the grooves for the sliding elements.
