Abstract (en)
The dispenser has a controllable motor unit (48) mounted in cooperation with a piston (46), and constituted by an electric supply source (60) controllable from a control input (62). The unit (48) has a field coil (66) coupled with a magnetic core (64) and connected to output of the source. A treating unit (68) has a prohibiting unit to prohibit the source from supplying the field coil during a determined time constant.
