Abstract (en)
A socket suspension assembly includes a suspension rack (10) and at least one socket rack (20) slidably and rotatably mounted to the suspension rack (10). The suspension rack (10) includes a post-like structure and has at least one groove (11) longitudinally defined in an outer periphery of the suspension rack (10). The socket rack (20) includes a loop (21) rotatably and slidably sleeved on the suspension rack (10) and a stub (22) radially extending from an outer periphery of the loop (21). The stub (22) is adapted to be connected to a socket.
