Abstract (en)

[origin: EP1681400A2] The device has a roller blind box (5) in which a roller blind strip is accommodated in the spooled state and two guides (6) mounted on the box for the lateral ends of the strip. The roof window (1) has an opening frame (2) and a panel frame (3) that is pivotably mounted about its central region and sliding connections between the guides and panel frames with rotation points in the region of the ends of the panel frame at a distance from the outer edge of the panel frame.
