Abstract (en)  
[origin: EP1681406A2] The kit for a wall connection profile (1) comprises at least three sections (2-4) extending in the longitudinal direction of the wall connection profile and are connected into a hollow component forming the wall connection profile. The three sections are flat and flexible and are transferable from a first state in which the sections are movable and rolled up from a flat or flexible arrangement into a second state in which the sections form the wall connection profile. At least two sections, and preferably three sections, are connected at least in a first state.
