Abstract (en)  
[origin: EP1681432A2] The roller blind (5) has a roller blind box (6) for accommodating a spooled roller blind and a holding device for attaching the roller blind to the roof window (2). The holding device has at least one bearing block elastically bendable in the direction of the longitudinal direction of the roller blind box with an element pointing in the opposite direction to the bending direction that engages a receiving recess in the roof window.
