Abstract (en)

[origin: EP1681435A2] A sun blind with integral safety opening facility has the edges of the blind gripping fixed guide lines (5). The bottom ends of the guide lines are secured to fixed points (7) which are unclipped in an emergency. The top ends of the guide lines are fed over pulleys (8) to a tensioning system (6) which reels in the guide lines on release of the bottom catches. The catches grip the bottom bar (4) of the blind and pull it into an open, or partially open setting, enabling safe emergency exit.
