Abstract (en)
[origin: EP1681436A2] The roll-up shutters for a window, a door or suchlike, especially for a skylight, has a roll-up shutter box in which is accommodated a shutter web in the wound-up state, two guide components connected to the roll-up shutter box for the guiding of the side ends of the web, and at least one operating unit constructed as a scroll spring, the spring band (20) of which serving as a tension element acts in the region of the forward end of the roll-up shutter web (9). An independent claim is included for a method for preferably tool-less coupling or uncoupling of a roll-up shutter web by an operating unit.
