Abstract (en)

[origin: EP1681449A2] The method is for the control of an internal combustion engine in which a volume of fuel in a first operating mode is predetermined according to a first specification for the quantitative calculation, from at least one torque variable, and the fuel volume in a second operating mode is predetermined according to a second specification for the quantitative calculation, from at least the torque variable, and a control variable is predetermined from at least the torque variable. An independent claim is included for a device for the control of an internal combustion engine by application of the aforesaid method.
