Abstract (en)

The device has a control stem actuated by a vehicle driver. The control stem is coupled to a stem (105) of a selector device (7). The stem (105) is coupled to a tubular body (24) that is preloaded by a preloading spring and a ring unit. The tubular body is operatively coupled to a rotary selector unit, where the tubular body has a set of longitudinal slots. A ball (28) is housed in a circumferential chamber of the body.
