Abstract (en)
[origin: WO2005032296A2] The invention relates to a tight envelope consisting of a flexible and transparent material enabling the controls of the equipment to be protected (electronic or otherwise) to be actuated, and provided with a system for pressurising the unit during underwater dives. Said envelope is provided with a tight closing system and optionally a fixing and/or handle system in order to facilitate the anchoring or gripping thereof, in addition to a support for positioning an underwater photographing device inside the envelope. Said envelope can also be provided with tight earphones with a tight cable passing through the wall of the envelope, for connecting to an internal appliance such as a stereo headset.
