Abstract (en)

[origin: WO2005044185A2] A cosmetic or pharmaceutical emulsion composition that is topically applied to the skin to protect it against damage caused by electromagnetic field generated from everyday appliances such as televisions, computers and cellular phones. The compositions contain ambient electromagnetic wave dampening effective amounts of at least one single domain magnet as the sole magnetic component and a non-magnetic ionic component. The sole magnetic component works particularly well in the composition of the present invention when it comprises granatite and when the composition is an oil in water emulsion.
