Abstract (en)

[origin: WO2005042353A2] The present invention is directed to a method of wrapping a rounded bale, and more specifically, to a method of wrapping that fully envelopes the rounded bale and ties at either end so as to maintain the integrity of the bale during, pick-up, transport, and storage. In one embodiment, the wrap ties at either end. In other embodiments, the integrity of the bale is enhanced in that the wrap clings to the surface as well as the ends of the bales. The wrap may comprise elastomeric material to facilitate clinging and conformance to the bales.
