Abstract (en)

[origin: WO2005045130A2] The invention relates to a machine for the production and/or treatment of strip or sheet material (20), particularly paper or cardboard, which is connected to at least one associated fuel cell (26) such that the thermal energy produced by the fuel cell unit (26) can be supplied to the machine as operating energy. Thermal energy produced by the fuel cell (26) can be supplied to at least one heating section (10) of the machine, said section being embodied in such a way that it can heat or be heated during an operating state of the machine.
