Abstract (en)
[origin: WO2005045336A1] Known egg trays for use in a refrigeration device have a base (1) the top of which has at least one depression. The aim of the invention is to allow for a simple method for producing different egg tray models having different capacities. For this purpose, the base (1) comprises at least one channel (3) for receiving eggs (5) in a lying position.
