Abstract (en)

[origin: US2006265925A1] A locking lever for spring loaded retainment of a removable ammunition magazine on a firearm and methods of operating the same are disclosed. An example locking lever includes a locking end that engages the ammunition magazine in a locked position and retains the magazine. The example locking lever also includes an operating end for rotation of the locking end to an unlocked position in which the locking end releases the magazine. The operating end is provided with at least a first operative control and a differently oriented second operative control at least one of which can be actuated to rotate the locking end into the unlocked position.
