Abstract (en)

[origin: EP1683736A2] Bag packing (10) has three sides of connected front wall (13) and rear wall (14), which limit the bag opening (19). In the range of bag opening, multiple first and second working closure elements are attached which close bag opening completely and firmly against first opening. Second closure element is arranged within bag opening at a distance from first closure element, especially above it. Independent claims are also included for the following: (A) Method for manufacturing bag pickings from foil for bulk or fibrous material; and (B) Device for manufacturing bag pickings from foil for bulk or fibrous material.
