Abstract (en)

The device has a passage lock (10) for recognizing a protection tag. The protection tag is not deactivated and the passage lock is arranged at a doorframe of an elevator (1) and/or in a balustrade (7) of an escalator (2). An alarm is activated on recognizing the protection tag that is not deactivated. An elevator car (4) and/or the escalator are temporarily set in specific driving mode when the alarm is activated. Independent claims are also included for the following: (A) a method for installation of a protection device for protection of goods against theft (B) a method of protecting goods against theft.
