Abstract (en)

[origin: WO2005049236A1] The invention relates to a method for cleaning folding rolls (2, 3) arranged on a robot arm and guided along a folding flange during the folding process. According to said method, the folding rolls (2, 3) fixed to the robot arm are rotated in a cleaning station (1) by means of a drive device (4), and the running surfaces (11) of the folding rolls (2, 3) are cleaned. The folding rolls (2, 3) are driven by means of a friction wheel (6) engaging from the outside.
