Abstract (en)

[origin: FR2862310A1] The method involves preparing an aqueous pigment composition having 30 percent of solid matters from an aqueous dispersion composed of an organic phase dispersed in a dispersing aqueous phase. The dispersion contains with respect to its solid matter 94 to 99.5 percent of biodegradable polymer in a dry organic phase and a 0.5 to 6 percent of stabilizing agent. Independent claims are also included for the following: (a) an aqueous pigment composition comprising an aqueous dispersion (b) an aqueous adhesive composition.
