Abstract (en)  
[origin: WO2005040533A1] The invention relates to a hardware for a fully-glazed door (2) comprising a top hardware (3) which substantially consists of a hardware body (4) provided with a glass reception area (21) and/or a clamping fitting for a glass wing and a pivot stud (7) which is displaceable in a blind hole (53) and embodied in such a way that it is engaged in a trust bearing arranged in a transom or a frame. In order to obtain an anti-intrusion hardware after the door mounting, the pivot stud (7) of the top hardware is fixed in such a way that the glass wing is used as an anti-lifting security when the glazed door is closed
