Abstract (en)

[origin: WO2005050418A1] The invention relates to a method for accessing a data processing system (D1) formed from data processing units (1, 2, 3) that are networked for data exchange. The aim of the invention is to enable a system technician (8) to access protected data exclusively according to the four-eye principle. To this end, an authentication element is respectively allocated to a system administrator (4) and the system technician (8).
