Abstract (en)  
[origin: EP1685755A1] The self-propelled maize harvester has a harvesting unit at the front which is made up of three equal sections. The outer sections (4, 5) are mounted on pivots (12, 13) at their inner end and can swivel through 180[deg] so that they rest in a stack on the central section (3) when the machine moves along the road.
