Abstract (en)

[origin: EP1686084A1] The device has entrainment members (6) fixed on draw means (5) at intervals and moving past supply stations (20) along the conveyor path (2) so that the sheets are supplied running in the same direction from the supply stations over a downwardly inclined conveyor path (33) which has a conveyor section (7) which is convex in the conveyor direction (10) followed by a concave conveyor section. The delivery end of the conveyor path can be followed by a preferably position-adjustable guide table (10).
