Abstract (en)

Transport chassis (4) for a demolition tool comprises a frame, an upper bearing pin (6) and a lower clamping pin (7) and spring/damping system (8). The demolition tool is transported in an open position in the chassis and is stored on the upper bearing pin. A defined distance from the demolition tool to the lower clamping pin is formed and the demolition tool is brought into the closed position for transportation. Preferred Features: The lower clamping pin is guided in a kidney-shaped groove. The spring/damping system is mechanically operated. The chassis is arranged on a base vehicle.
