Abstract (en)

[origin: WO2005047046A1] The invention relates to a method for improving an adaptive cruise control system. In said system, the option or necessity for the driver to take over control of the vehicle in the immediate future is determined and the driver is alerted to the fact that a take-over is imminent, or the attention of the driver is increased, if the option or necessity for said driver to take over control of the vehicle is identified.
