Abstract (en)

[origin: WO2005047047A1] The invention relates to a headway distance control of a vehicle. According to the inventive method, a system reaction of an electronic brake control system of the vehicle to the brake pressure request of the headway distance control takes place relatively slowly so as not to exceed a maximum pressure build-up or pressure reduction rate. Alternatively, brake control is planned ahead in accordance with a brake pressure integral.
