Abstract (en)
[origin: FR2862830A1] The method involves detecting transmission of a null object as parameter from a request or a response before sending the request or response from a local process to a remote process. The object is processed so that content of the object is made available to the remote process. Send request or response is monitored upon satisfying processing condition corresponding to the reception of the content. Independent claims are also included for the following: (a) a computer station (b) a computer station network.
