Abstract (en)

[origin: EP1688379A2] Method for winding a material strip from a material strip roll involves forming a strip start in which the outer layer of the material strip is separated in the lower third in the force of gravity direction and the remainder of the material strip lying on the roll is removed. An independent claim is also included for a device for winding a material strip from a material strip roll comprising a separating unit (7) in a region below a bearing unit (5).
